For Question 12 – Mathy asked us to add in the response we used for AP on Friday – it is below – so you can pull it into your q and a document.

Thanks ng

AP Response

It's our understanding that 15 other mine investigations were put on hold to assess whether there were risks of another accident; do those remain on hold? If not, why not? If so, what is expectation on when that assessment will be complete.

We're compiling a list of mining sites under EPA jurisdiction where the Administrator's statement on field investigations would apply.

Shaun, I reviewed an earlier version of this and provided much of what's here, including the notes for David to provide the answers. The more reviewers the better, though, so if folks have edits, please make them.

David,

I think questions 1-11 and 14 fall to you. Some already have answers, so you just need to review the answers and provide edits as appropriate. Make sure to focus in particular on the ones with no answers or question marks.

Joan and Bob, the last four look to fall to you. Can you please take a shot at drafting answers for these?

Subject: Qs and As

In addition to questions that you are working on – attached are the current version of Qs and As – additional information needs to be filled in and questions answered. Can someone from Region 8 take the lead in farming out and organizing these and get back to me a revised version of this. Thanks.
